## Customer Spotlight

Volume 13 - Issue 2

April 2006

### Carolina Software Welcomes Omni Recycling of Babylon!

Located on Long Island, New York, Omni Recycling provides a variety of recycling and waste disposal services to its customers. Opening its gates at 4:00 am, the trucks line up early to unload their materials into the transfer

station. Omni, like many transfer stations, accepts a number of different materials such as municipal solid waste

Before: A pile of pallets awaits the mulch grinder.

and construction debris into their facility. However, it is the long list of recycling services that Omni offers that makes them unique.

### Pallets to Mulch

One of the many recycling services that Omni offers is the recycling of wood pallets. After a pallet is no longer usable, it can be disposed at Omni's facility where it will soon be put to another use. The wood materials from which pallets are made are sent

After: Old pallets transformed into valuable mulch.

through a grinder where the mulch making process begins. After the main ingredient of shredded wood is produced, an organic dye is added to the wood chips to give the product a more attractive appearance. Now what was once a pile of unusable pallets is now a pile of usable

## New Product Spotlight

**WasteWORKS® for Container Billing**

Make roll-off management easy with **WasteWORKS, now for Container Billing.** WasteWORKS now tracks containers so you know where you put it, who has it, & what day of the week you're going to pick it up. Call Carolina Software, Inc. for details: **910.799.6767 ext. 2.**

WasteWORKS customers since 1999, and new customer, Dunn Construction in Lindon, Utah, are the latest facilities to put the powerful new WasteWORKS roll-off management features to the test.

A busy site even before hurricane Katrina, the River Birch Landfill has been working harder than ever to deal with the massive amounts of debris from the cleanup. Armed with WasteWORKS, WasteWIZARD and now WasteWORKS for Containers, the River Birch Landfill is running 24 hours a day across multiple lanes to keep up with the almost overwhelming amount of inbound debris. The addition of WasteWORKS for Containers has allowed them to consolidate all of their waste and container rental business into one system that produces a cohesive bill-

ing mechanism and a central, historical database for comprehensive reporting.

Dunn Construction, who became a customer last year, was instrumental in guiding some of the early development and enhancements to WasteWORKS for Containers. Their high volume container business and years of experience in the industry provided developmental insight that helped make WasteWORKS for Containers a powerful new tool for their business and future customers too.

mulch that can be used in flower beds, playgrounds or any other landscape project you can think of.

**Other Services**

Omni offers other recycling services for municipalities, landscapers and contractors. Much of what goes into the transfer station for disposal

can be processed for reuse. Scrap metals separated from construction and demolition debris, and nutrient rich compost created from organic yard waste are some of the by-products of Omni's inbound waste.

Be sure to go and visit Omni Recycling online at [www.omnirecycling.com](http://www.omnirecycling.com).

**Update:**

**Spotlight on Automation**

**WasteWIZARD**

**C**arolina Software, Inc., developer of the industry's leading solid waste management software, WasteWORKS, is now leading the way with the latest technology in scale lane automation! WasteWIZARD automation turns your scale lane into an express lane.

Scale lane automation for facilities using the WasteWORKS software package.

**Are you a WasteWORKS Power User? Are you interested in creating customized reports from your WasteWORKS data? For customers who want to add additional power to their WasteWORKS reporting tools, Crystal Reports is the perfect addition. Carolina Software technicians are available for on-site assistance with the installation of Crystal Reports. Call Carolina Software today for more information!**

**WasteWALKER Version 3:**

The power of WasteWORKS in the palm of your hand!

**NEW!**

The new WasteWALKER Version 3 has been released and is now available for installation at your WasteWORKS facility. Just like WasteWORKS, WasteWALKER allows you to enter multiple line item, count-based, volume, and even weight-based materials into one compact and portable device. At the end of the day WasteWALKER tickets transfer easily into WasteWORKS where they can be closed out and posted. WasteWALKER now features Bluetooth technology which allows you to print tickets to a wireless printer. Now with the latest Windows Mobile 2005. Call 910-799-6767 x. 2 or email [info@wasteworks.com](mailto:info@wasteworks.com).

**Ordering Forms**

Ordering WasteWORKS tickets, statements and invoices from Carolina Software is as easy as ever. Just fax in your completed order form and we'll take care of the rest. If you don't have an order form, just call Carolina Software or visit our website to order on-line! \*\*\*\*\*

**Did You Know?**

Here are the answers to some common WasteWORKS questions.

**Can WasteWORKS help me manage my roll-off container business?**

- Yes, Carolina Software has just released WasteWORKS for Containers. This new version of WasteWORKS will combine the time tested functionality of our DOS-based CBS package (Container Billing System) with the industry-leading WasteWORKS software for solid waste management. The combination will be one complete and easy to use package for managing your facility and your roll-off containers! If you would like more information about WasteWORKS for Containers, please call 910-799-6767, ext. 2.

**When entering payments for invoice customers, is it possible to distribute a single payment across multiple invoices?**

- Yes! The latest version of WasteWORKS now provides functionality to post payments across multiple invoices for an account. Please call our support department at 910-799-6767, ext. 1 for more information about new WasteWORKS versions and features.

**WasteWORKS States Update:**

Since WasteWORKS was first introduced in 1987, the number of installed customers and geographic locations has increased dramatically. Locations in which facilities are using WasteWORKS include the areas shaded in gray.
