Carolina Software Welcomes The City of Blakely, GA and Portage County, WI to the WasteWORKS Family

The City of Blakely, GA

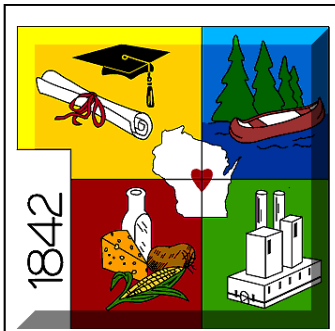

"From the Kolomoki Mounds in northern Early County to the Historic Echodell House South of Blakely, our region is blessed with abundant resources and historic treasures. The proud citizens of Blakely, Georgia enjoy a good rich life in history, tradition, prosperity and faith in the future. We welcome you to our home on the Internet, and we invite you to visit us to experience this wonderful community for yourself." This statement from the City of Blakely's website says a lot about this small Georgia community. It also speaks to the importance of the work performed by the staff at the city's transfer station to protect this area's valuable resources.

Working for Peanuts

Located in southwestern Georgia and incorporated in 1818, Early County (Blakely is the county seat), has a population of just over 12,000 people and has a total area of 511 square miles. Like many communities in this region,

farming is at the core of Early County's economy. Peanuts are the predominant crop and if you want to know just how important peanuts are to this community's economy, you can visit the peanut statue on the square in Blakely!

The City of Blakely recently added WasteWORKS to their solid waste operations, which has not only provided them with a new, simplified ticketing module for their scale house, but it has also allowed them to take advantage of WasteWORKS' robust receivables package and a unique integration with the City's financial package.

Portage County, WI
Solid Waste Department

"Solid waste is all around us! It is defined in the statutes using a lot of complicated wording, but for general purposes we will call it...garbage. From the old worn out shoe to the remains of our fast food meal to the remnants of a decaying factory to dust, dirt and crud we sweep from our floors. Hu-

The NEW WasteWIZARD is the New Automation Specialist

Carolina Software introduces the latest in scale lane automation technology. The recently re-designed WasteWIZARD system now features an industrial, stainless steel enclosure, a professionally developed electrical and wiring system, and an integrated camera system for use with the WasteWORKS Vision System. The new WasteWIZARD system is the perfect automated addition for WasteWORKS sites, and a great upgrade for existing WasteWIZARD installations. Call today for information about adding the NEW WasteWIZARD to your site!

man beings produce garbage and someone needs to tend to it!" It's easy to see from this excerpt on the Portage County Solid Waste Department website that their approach to dealing with solid waste and educating the public about where their waste ends up is one of common sense and straight talk. But this doesn't mean they don't take their responsibility seriously.

Portage County, located right in the center of Wisconsin, just cut the ribbon on a brand new transfer station to replace the soon-to-be capped landfill, a landfill that is now earmarked with a multi-million dollar com-

mitment to ensure proper monitoring and care for the next 40 years.

The Solid Waste Department also operates a MRF

The Portage County MRF Provides a full service recyclables center and education center for county residents.

and takes a pro-active approach educating the public about recycling and waste. In fact, the Department has a Solid Waste Education and Program Develop-

continued from page 1:

ment/Coordination Team. The Team helps citizens explore how to reduce the amount of waste they produce, connects individuals to various solid waste resources and provides information regarding the legalities of recycling and solid waste. They also provide tours of both the transfer station and the MRF, with informational sessions facilitated by the experienced solid waste educators of Recycling Connections, Inc. The program's educators also spend time out in the community sharing information with organizations, schools and businesses.

What Else?

In addition to the services provided at the transfer station and MRF, the Department administers a wide variety of other solid waste programs to meet the needs of Portage

County residents, including curb-side garbage/recycling services, drop-off garbage/recycling services, electronics recycling, appliance & tire recycling, waste oil & anti-freeze recycling, brush recycling and household hazardous materials services. Ok, so they basically do everything!

In the Nick of Time!

With the new facility finally open and WasteWORKS installed to help them manage their operations, you could almost hear a collective sigh of relief from the Department's staff. Only one week separated the opening of the new transfer station with the scheduled closing of the landfill.

Carolina Software would like to welcome both the City of Blakely, GA and Portage County, WI to the WasteWORKS family.

Ordering Forms On-line

Ordering WasteWORKS tickets, statements and invoices from Carolina Software is as easy as ever. WasteWALKER V.4

WasteWALKER Version 4 features the latest in mobile hardware and software technology, utilizing the new Windows Mobile 5, Symbol MC70 Handheld Computer, a new Bluetooth capable printer, and many new software features for added flexibility. WasteWALKER V.4, an even more fully featured system than its predecessors, is not only a great device for processing transactions at convenience sites, household hazardous wastes facilities, recycling centers and yard waste sites, it is also a great backup for WasteWORKS scale houses during down time situations. WasteWALKER is capable of handling transactions based on weight, count or cubic yards. Users can even enter the dimensions of a container and WasteWALKER will calculate the cubic yards for you!

WasteWORKS® for Containers
Make roll-off management easy!

WasteWORKS now offers even more functionality with the addition of **Container Billing**, a module with features for roll-off management. **Container Billing** helps track containers so you know where you put it, who has it, and what day of the week you're going to pick it up. Now you can use the power of WasteWORKS to manage your container business!

- Easily manage work orders, service locations and routes.
- Generate your rental charges and billing with ease.
- Maximize efficiency with a simple, easy-to-use interface.

Did You Know?

Here are the answers to some common WasteWORKS questions.

Is WasteWORKS compatible with Microsoft Windows Vista?

Yes, WasteWORKS is compatible with Vista and we recommend Vista Professional. **Users should consult with Carolina Software technical support prior to upgrading to Vista to discuss compatibility with third party software packages like Crystal Reports and PC Anywhere.

Does Carolina Software provide on-site support?

Yes! Carolina Software technicians can provide on-site support for things like upgrades, training and assistance with new hardware. In addition, Level 2 Support is available and provides customers with a yearly, on-site upgrade visit. Call Carolina Software today to schedule an on site visit or for more details on Level 2 Support! 910-799-6767.

WasteWORKS States Update:

Since WasteWORKS was first introduced in 1987, the number of installed customers and geographic locations has increased dramatically. Locations in which facilities are using WasteWORKS include the areas shaded in gray.
