Butte-Silver Bow Landfill, Montana

In Their Own Words:

The following information was provided by the staff of Butte-Silver Bow Landfill. The Butte-Silver Bow Landfill recently added WasteWORKS-SQL to operations and we're certainly happy to have them on board!

"The Butte-Silver Bow (BSB) Landfill is owned and operated by the City and County of Butte Silver Bow, which is located just a few miles from the city of Butte, Montana. The Landfill is licensed by the State of Montana as a Major Class II and a Class IV Landfill. There are seven full time employees that include a superintendent, two heavy equipment operators, two laborers, and two scale attendants. The landfill operates seven days a week – rain, snow or shine!

Temperatures in Butte can range from 90 degrees in the summer to 40 degrees below zero in the winter, so late spring to early fall is the busiest time of year. One of the biggest challenges at the landfill is the wind - miles of fencing and a dozen wind screens help to keep our grounds clean. The BSB Landfill accepts municipal solid waste from two counties, demolition material and recyclable materials such as metal, cardboard, paper and oil, which is used to heat the equipment building. All of the recyclable materials are hauled to local recycling companies - this provides additional revenue for the landfill.

The landfill coordinates a six week long clean up cooperative, aptly named "Beauty Butte". Community participation is fantastic in this yearly event which serves as the start of the summer cleaning season. Citizens, students and local civic groups are encouraged to clean up property and lots throughout the city, with prizes donated by local business given away for the finale.

Latest WasteWORKS Versions:

WasteWORKS v. 7 (7.615)

WasteWORKS-SQL (1.357)

Visit our website for more details.

WasteWORKS Training

On-site and remote training and assistance are available from Carolina Software.

Our technicians can visit your site(s) and provide hands-on training for WasteWORKS and our other products. Each visit is customized to meet your needs and is a great way to help new employees get up to speed quickly, brush up on reporting and billing functions, or just to learn what's new with the latest version of WasteWORKS. An upgrade is included.

Remote training is also available. For customers who simply want a few hours of dedicated time or even a whole day, remote assistance is a great option! (requires high speed internet connection).

Please call 910-799-6767, ext. 2 for more information.

The NEW WasteWIZARD

Vision camera is now a built in option for the WasteWIZARD enclosure!

Carolina Software introduces the latest in scale lane automation technology. The recently redesigned WasteWIZARD system now features an industrial, stainless steel enclosure, a professionally developed electrical and wiring system, and an integrated camera system for use with the WasteWORKS Vision System. The new WasteWIZARD system is the perfect automated addition for WasteWORKS sites, and a great upgrade for existing WasteWIZARD installations. Call today for information about adding the NEW WasteWIZARD to your site!

WasteWORKS Vision

BSB continued:

The BSB Landfill opened in March of 1994 and was, at that time, the newest and most technologically advanced landfill in the state. Since that opening, not much has changed. Garbage trucks come and go, and the landfill continues to fill. But, there are some exciting changes on the horizon!

Illegal dumping is an issue – when people drive all the way to the landfill and the gates are closed, most people don't take their garbage back home. So, the landfill expanded operating hours to accommodate homeowners and businesses in the area. A convenience site called the Alley Rally is also placed in city limits during the summer months which allows citizens to dispose of big loads without traveling to the landfill. This program has been a great success and has led to discussions of constructing a transfer station that would be open year-round.

The addition of WasteWORKS will be a valuable tool for the management of the landfill. The tipping fees are currently determined by volume, but may be replaced by weight based fees if the resulting data supports this change. This takes the guess work out of assessing charges and assures that customers are being charged consistently and fairly.

One of the biggest changes will be the addition of more recycling bins on site. The main goal is to extend the life of our landfill and promote recycling in the community as much as possible. While recycling is not mandatory in our community, making it as easy as possible will (hopefully!) encourage the public to participate in a recycling program.

Since opening the new landfill seventeen years ago, the former landfill has been capped and now serves as a recreational park. There are two softball fields, two baseball fields, a driving range and many amenities to serve the public. If you didn't know it was once the landfill, the lush grass and beautiful view wouldn't give it away!"

WasteWORKS-SQL

WasteWORKS-SQL is available as a robust, off-the-shelf package for new customers and existing customers looking to expand on the proven capabilities of the industry's leading solid waste management software product.

WasteWORKS-SQL maintains the same flexible functionality

and simple usability of prior offerings, but provides users and management with expanded reporting capabilities, Windows level security and fast, efficient processing in a wide range of network environments. The new WasteWORKS-SQL combines all of the benefits of a SQL Server platform with an easy to

maintain, affordable, off-the-shelf solution for managing your facility.

Key Features:

- Combines the industry's leading off-the-shelf package for simple and efficient ticketing, billing and reporting with the power and security of MS SQL Server.
- Provides unlimited reporting

with WasteWORKS-SQL stock reports, Crystal Reports and MS Reporting Services.

WasteWORKS stock reports run up to 20 times faster than with previous versions, even with large data sets and slower network connections.

- Real time calculation of customer balances and totals fields.

*****Ordering Forms Online*****

Ordering WasteWORKS tickets, statements and invoices from Carolina Software is as easy as ever. Using the WasteWORKS on-line order form at www.wasteworks.com means that you will have instant access to the latest products and prices. Start ordering your forms on-line today! If you don't have internet access at your site, you can still fax in your order to 910-799-1177.

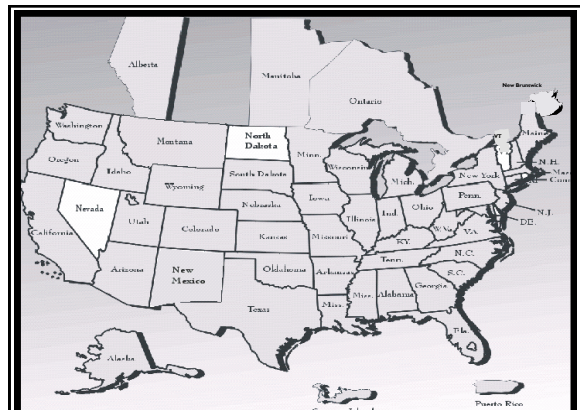

PowerPay Credit Card Processing

Carolina Software, in partnership with PowerPay, one of the most trusted payment processing providers in the US, has announced exclusive pricing for Carolina Software customers that can actually help **decrease** credit card processing fees. PowerPay's platform is now integrated with Carolina Software allowing credit transactions to flow immediately into your software eliminating the need to re-key sales at the end of the day.

The PowerPay payment processing solution provides you with:

- A simple, fast application process
- An all-in-one PC based payments solution that saves time and eliminates the need for an external, stand-alone point-of-sale terminal
- Full e-commerce support
- 24/7 technical support
- Advanced features such as recurring payment capability
- Easy access to transaction and batch history
- Superior value and competitive pricing – 9 out of 10 times PowerPay is able to match or better current processing rates

If you would like to learn more about integrating PowerPay's payment processing solutions with your business - and the exclusive pricing for Carolina Software customers – then contact PowerPay today at 877-775-6900 .

WasteWORKS States Update:

Since WasteWORKS was first introduced in 1987, the number of installed customers and geographic locations has increased dramatically. Locations in which facilities are using WasteWORKS include the areas shaded in gray.
